

SupaReel - Assembly Instructions

#238000

1. Remove nut, bolt, brass brake and one of the washers from the handle.
2. Slide reel onto handle. There should be a washer separating the reel from the spring.
3. Place second washer onto handle. Reattach bolt, brass brake and nut. Tighten nut enough to provide security while still letting the brake operate.
4. Remove white plastic nut from the knob bolt.
5. Remove knob from bolt.
6. The bolt (with metal nut still attached) inserts into the nut-shaped hole on the inside of the reel.
7. Place knob over bolt and secure with white nut.

To use the brake:

Flip the brass brake to apply pressure to the reel and lock it into place.
